SALTS FOR KIDNEYS

Take a Glass of Salts If Your Back Hurts Or Bladder Bothers.

The American men and women must guard constantly against Kidney trouble, because we eat too much and all our food is rich. Our blood is filled with urle acid which the kidneys strive to filter out, they weaken from overwork, become sluggish; the eliminative tissues clog and the result is kidney trouble, bladder weakness and a general decline in health.

When your kidneys feel like lumps field your back hurts or the urine cloudy, full of sediment or you are diged to seek relief two or three mes during the night; if you suffer with sick headache or dizzy, nervous spells, acid stomach, or you have rheumatism when the weather is bad, get from your pharmacies about four ounces of Jad Saits; take a tablespoonful in a glass of water before breakfast for a few days and your kilneys will then act fine. This famous saits is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate ctogged kidneys; to neutralize the acids in the urine so it no longer is a source of irritation, thus ending bladder disorders.

Jad Saits is inexpensive; can not injure, makes a delightful effervescent this every home; scause nobody can make a mistake having a good kidney flushing any time.

LONG-HAIRED BOLSHEVIK CAUSES NEW YORK PANIC

NE WYORK, March 7—Theater-going crowds in Forty-eighth street fled in panic last night when a long-haired person who said he was Enrico Fabatino, 'president of the Buffalo Bolsheviki,' ran amuck with a revolver, firing in all directions.

Only one of the shots took effect, John P. Rothman, a broker, was slightly wounded in the left shoulder. After firing four shots, shouting wildly and flourishing his weapon, Fabatino dashed toward Broadway. Several patrolmen reached him almost simultaneously and he was disarmed. Charges of felonious assault and carrying concealed weapons were preferred against him, and he was sent to the psychopathic ward at Bellevue hospital for observation.

ages of manufacture. The meat of the matter, or the nigger in the woodpile, as it were, was lack of adequate pressure.

The demand, according to Mt. Turner, has been too esteat in the past few months for the purifying and distributing apparatus of the plant. The plant was capable of generating 250,000 cubic feet of gas per hour, which would have been adequate to supply the peak demands of the consumers, he said, but the company did not have and could not get, because of war conditions, more than enough distributing and purifying apparatus to permit the furnishing of more than 175,00 cubic feet of gas per hour.

Had to Cut Pressure. Often at the peak hours breakfast, uncheon and dinner hours of the day storage tanks of the gas tanks would eggs to empty with such rapidity that t would be necessary to reduce that the substitute of the substitu

said, until gas service could have been resimed.
But when the pressure was cut down the gas came slowly through the pipes in the homes of the consumers. If the housewife was preparing a meal, or if some member of the family were heating water for a bath, it took just twice, perhaps three times, as long to do these things. Now perhaps 15 per cent of the heating value of gas is wasted by radiation, by dissipation into the air while it is huming. Mr. Turner explained, so that if it is necessary to burn the gas twice as long, or three times as long, as the case might be, just twice or three times as much gas would be dissipated by radiation.
This is what made the bills go sky-rocketing, said Mr. Turner. "Why, I have been up against it just like the rest of you," he said. "Why, wasn't my bill \$18 iast month when it should have been only \$9."

Rebates—Oh, No.

Rebates-Oh, No. "But your company is not offering to give any rebates to the people, Mr. Tur-ner," the reporter for The News Scim-

its interposed. Turner: "no, that's true. But, say what you please; speak for watered stock and padded bills and big bills, the company at no time in the past 12 months has realized enough nioney from the sale of gas to pay for the oil and coal used in its manufacture."

the oil and coal used in its manufacture."

When the gas service is resumed the product will be more pleasing to the oilactory nerves, the public may be assured. There will be no particular difference in the candle power or heat units of the gas, but it will smell better. The pungency which was suggestive of summer breezes from the Chicago stockyards, or the respiration of a head of limburger, mingled with a rust from Hades, will be gone.

This was the explanation made by Jersey F. Ramier, secretary of the Memphia Gas and Electric company, when asked by The News Scimitar to explain just what was meant when the company made the following statement in an advertisement appearing in the

Relief Only in Odor.

Relief Only in Odor.

Neither Mr. Bamier nor Mr. Turner would admit that the gas which the company has been furnishing the people for the last few months was capable of any improvement further than in the esthetic matter of odor. Mr. Turner explained that the company has been furnishing continuously a "carbonated water" gas, which they produced when using either coal and oil or coke and oil. Mr. Turner imparted the secret, however, that "not a pound of coal" had been used for a week by the company in the production of gas at the plant. His interrogator was unable, though he tried hard to understand his explanations, just why the company thought it advisable, when gas service has reached the maximum of inefficiency and the public the peak of exasperation, to abandon the use of coal appeared to be inconsistent with the previous statements that the company had been manufacturing the same kind of gas with a composition of either coal and oil or coke and oil.

Explanation Improbable.

Mayor Monteverde and the commis-sloners say they want a written expla-nation from Mr. Stieg as to why gas has been bad for some six months past Mr. Stieg says he wants to presen the gas company's side of the case ver bally, where he can be cross-examined n open session of the council.

The mayor replies with some bombast

that he wants the defense only in writing, and hence there probably will be no public explanation of gas conditions until the case against Mr. Stleg comes up for trial in the higher courts. With

On the face of the correspondence is on the take of the correspondence it would seem that Mr. Stieg's suggestion for a verbal open hearing, where questions could be asked, would bring out more facts that an ex-parte statement from him would. Again there may have been a private "gentlemans" agreement between Messrs. Monteverde and Stieg to agree to disagree and hence have in fact no explanation, while both appeared in the record to be clamoring for it.

stieg to agree to disagree and hence have in fact no explanation, while both appeared in the record to be clamoring for it.

Of course the explanation of the gas company would be interesting, but what those who have suffered for moths from noise gas and lack of hast and din lights, is not explanations but better conditions.

Several courses are open to the city administration to pursue to that end, but until conditions became so had that the people were diven to desperation the city hall crowd took no action. Now they have simply created a political job for Will Reisser to check overold gas bills, with the suggestion that the city may recover some of the amounts paid by consumers. Danger of this seems so remote that the gas office does not worry over it. The possibility of a court ordering a rebate on the Pebruary, 1918, bill is too slim to worry a gas officela, and so far as the people are concerned if any rebate were allowed by the courts it would be at least one and maybe three years before the last court acted.

But if the city fintalied a gas testing machine the city would have proof of the per cent of efficiency in the gas both at to heating and lighting and income the city sattorney could have proof of the consumers of Memphis without serving the corporations, the commission could direct the city attorney could have proof of the consumer of Memphis without serving the corporations, the commission could direct the city attorney to apply in the pear of all of the consumers of Memphis without serving the corporations, the commission could direct the city attorney to apply in the pare of all of the consumers of Memphis without serving the corporations, the commission could direct the city attorney to apply in the pear of all of the consumers of Memphis without serving the corporations, the commission could direct the city attorney could have proof of the city attorney could have proof of the company, the receiver to operate the plant so as to afford pure gas for Memphis.
